Sample Review Sheet Answers for Chapter 12 and 12.2

Below are examples of typical review sheet answers for common topics within chapters 12 and 12.2 across various subjects.

Biology Example: Genetics and Heredity

- **Question:** What is Mendel?s Law of Segregation?
- **Answer:** Mendel?s Law of Segregation states that during the formation of gametes, the two alleles for a gene separate, so each gamete carries only one allele for each gene. This explains how offspring inherit one allele from each parent.
- **Question:** How do dominant and recessive alleles differ?
- **Answer:** Dominant alleles mask the expression of recessive alleles in heterozygous individuals. Recessive alleles are only expressed when an individual inherits two copies (homozygous recessive).

Chemistry Example: Chemical Reactions

- **Question:** What is the Law of Conservation of Mass?
- **Answer:** The Law of Conservation of Mass states that mass is neither created nor destroyed during a chemical reaction. The total mass of reactants equals the total mass of products.
- **Question:** How do you balance a chemical equation?
- **Answer:** To balance a chemical equation, add coefficients to the reactants and products to ensure the number of atoms for each element is equal on both sides of the equation.

History Example: The Civil Rights Movement

- **Question:** What was the significance of the Brown v. Board of Education case?
- **Answer:** The Brown v. Board of Education case was a landmark Supreme Court decision that declared racial segregation in public schools unconstitutional, marking a significant victory for the Civil Rights Movement.
- **Question:** Who was Martin Luther King Jr.?
- **Answer:** Martin Luther King Jr. was a prominent leader in the Civil Rights Movement known for his advocacy of nonviolent protest and his famous "I Have a Dream" speech.
