What Are Vickers Welded Cylinders?

Vickers, now part of Eaton Corporation, is renowned for manufacturing high-quality hydraulic components. Their industrial welded cylinders are hydraulic actuators designed to convert hydraulic energy into linear mechanical force. Unlike tie-rod cylinders, welded cylinders feature a seamless steel tube body welded directly to the end caps, resulting in a more compact and robust design.

This construction offers several advantages:

Higher pressure capacities due to fewer potential leak points

Enhanced durability in harsh industrial environments

Compact size ideal for space-constrained installations

Reduced maintenance requirements over time

These cylinders are commonly found in applications such as manufacturing equipment, heavy machinery, material handling, and agricultural machinery.
