Safe Practices for Using Aromatherapy with Children

Ensuring safety is paramount when incorporating aromatherapy into a child's routine. Children?s skin and respiratory systems are more sensitive, so following proper guidelines helps prevent adverse reactions.

General Safety Tips

- **Use Proper Dilution:** Essential oils should be diluted with a carrier oil (like coconut, jojoba, or almond oil) before topical application. For children, a typical dilution is 0.5% to 1% (about 1 drop of essential oil per 1 teaspoon of carrier oil).

- **Avoid Certain Oils:** Some oils, such as peppermint, eucalyptus (especially in undiluted form), and cinnamon, may be too strong or irritating for young children.
- **Use Diffusers Safely:** When diffusing essential oils, ensure the room is well-ventilated, and avoid overuse. Never diffuse oils in a child's bedroom for extended periods.
- **Supervise Usage:** Always supervise children when they are exposed to essential oils, whether

via inhalation or topical application.

Special Considerations for Different Age Groups

- Infants (0-12 months): Extremely sensitive; consult a pediatrician before use. Usually, it's best to avoid aromatherapy during this stage unless under professional guidance.
- Toddlers (1-3 years): Use very diluted oils and choose gentle, calming scents like lavender and chamomile.
