Problem 2: Volume of a Cone

A cone has a radius of 3 meters and a height of 4 meters. Find its volume.

- Recall the volume formula for a cone:

$$(V = \frac{1}{3}\pi r^2 h)$$

- Calculate $r^2 = 3^2 = 9$
- Plug in values: $V = \frac{1}{3} \times \pi \times 9 \times 4 = \frac{1}{3} \times 36\pi = 12\pi$
- Approximate: $12 \times 3.1416 \approx 37.70$ cubic meters.

electricity, which varies between rock types and moisture content.

Ground-Penetrating Radar (GPR): Using radar pulses to image shallow

4.

subsurface features.

Each of these methods contributes to a holistic understanding of the solid earth's

composition and behavior.

Solid Earth Fowler and Environmental Considerations

With growing awareness of environmental challenges, solid earth studies have taken on

new importance in sustainability and hazard mitigation.

Mitigating Natural Disasters

Accurate models of earth structure and fault mechanics can improve earthquake

prediction and risk assessments. For communities in seismically active regions, this
