Installing modern sewage treatment plants.

Sample IELTS Speaking Answers on Cleaning Up the Thames

Speaking tasks often ask candidates to describe environmental problems or discuss solutions. Below are examples of how to incorporate knowledge about the Thames cleanup into your spoken responses.

Example 1: Describe a river that has been cleaned up

"I would like to talk about the Thames River in London. It was once heavily polluted due to untreated sewage and industrial waste, which made the water unsafe for both people and wildlife. Over the years, the government and environmental organizations have worked hard to improve the situation. They built advanced wastewater treatment plants and launched campaigns to reduce pollution. This shows how e?ective community involvement and modern technology can be in restoring natural habitats."

"Communities play a vital role in maintaining the cleanliness of rivers like the Thames. 2.

"reducing river contamination."

Common IELTS Writing Task 2 Question and Sample Answer

Question:

Some people believe that cleaning polluted rivers like the Thames should be the government?s responsibility. Others think that individuals and communities should take charge. Discuss both views and give your opinion.

Sample Answer:

Pollution of rivers has become a pressing environmental issue, and the Thames River in London is a prime example of this problem. While some argue that the government should bear the responsibility for cleaning polluted waterways, others believe that individuals and communities also have crucial roles to play. In my opinion, both parties must collaborate to achieve sustainable results.

On one hand, governments possess the resources and authority to implement large-scale solutions. For instance, the installation of modern sewage treatment plants and enforcement of strict regulations on industrial waste disposal require signi?cant funding and legal power. Such measures have been instrumental in the gradual restoration of the Thames?s water quality. Without government intervention, these large infrastructural projects would be di?cult to carry out e?ectively.

On the other hand, individual and community involvement is equally important. Local residents can contribute by avoiding littering, participating in cleanup campaigns, and spreading awareness about the importance of protecting rivers. Community-driven

initiatives often complement governmental e?orts by fostering a culture of environmental responsibility. For example, volunteer groups along the Thames regularly organize riverbank cleanups, which help remove plastics and other pollutants that machines cannot easily collect.

In conclusion, the responsibility for cleaning polluted rivers should not rest solely on the government or individuals. A combined approach, involving policy enforcement and active community participation, is essential to preserve rivers like the Thames for future generations.
