In an increasingly interconnected world, the importance of local economies has gained significant recognition as a crucial pathway toward achieving sustainable happiness and well-being for communities. Emphasizing local production, consumption, and social cohesion can foster resilient economies that prioritize human happiness over mere financial gains. Transitioning to a more localized economic model not only reduces environmental impact but also strengthens community bonds, supports small businesses, and promotes a more equitable distribution of resources. This article explores the concept of "local is our future" as a foundational step towards an "economics of happ"—an economic paradigm centered on happiness, sustainability, and social well-being.

Understanding the Shift: From Globalization to Localization
