- Use of Headings and Subheadings

Clearly distinguish between different sections using headings. For example:

Newton's Laws of Motion

First Law:

An object remains at rest or in uniform motion unless acted upon by an external force.

Second Law:

Force equals mass times acceleration (F = ma).

Third Law:

Every action has an equal and opposite reaction.

Capturing Core Concepts and Definitions

Ensure your notes include critical definitions and explanations provided in episode 1301. For example:

- Force: An interaction that changes the motion of an object.
- Mass: The amount of matter in an object, measured in kilograms.
- Velocity: The speed of an object in a specific direction.
- Acceleration: The rate of change of velocity over time.

Use bullet points or numbered lists for clarity and quick review.
