Begin by engaging students in a discussion about weather and natural disasters. Pose questions like:

- Have you ever seen a tornado? What did it look like?
- What do you know about tornadoes?
- Why do you think tornadoes are dangerous?

Introduce basic facts about tornadoes:

- Tornadoes are powerful rotating columns of air that extend from a thunderstorm to the ground.
- They can cause significant damage due to their high winds.
- Tornadoes are most common in certain regions, such as Tornado Alley in the United States.

Use visual aids to illustrate the structure of a tornado, emphasizing the funnel shape, the rotating updraft, and the storm clouds.

2. Watching The Magic School Bus Twister Trouble Episode

Show an age-appropriate clip or segment from the episode that highlights tornado formation and behavior. Encourage students to pay attention to:

- How the students and Ms. Frizzle describe tornadoes
- The visual representation of a tornado in the episode
- Any safety tips depicted

Follow up with a brief discussion:

- What did you learn about tornadoes from the episode?

3. Science Explanation and Diagram Activity

Provide students with a diagram of a tornado's structure. Use this time to explain:

- The funnel shape and its parts
- The updraft and rotating wind
- How warm, moist air and wind shear contribute to tornado formation

Have students label the diagram, reinforcing their understanding of each part.

4. Hands-On Tornado in a Bottle Experiment

This popular experiment visually demonstrates how tornadoes form in the atmosphere. Materials:

- Two plastic bottles
- Water
- Dish soap
- Glitter or small particles

Procedure:

- Fill one bottle about three-quarters full with water.
- Add a few drops of dish soap and glitter.
- Connect the bottles using a tornado connector or tape the necks together securely.

- Flip the bottles and swirl to create a vortex.

Learning Outcome:

Students observe a mini-tornado forming inside the bottle, helping them understand the rotating column of air in real life.

Encourage students to observe:

- The shape of the vortex
- How the movement mimics a real tornado

Safety and Preparedness Discussions

A crucial part of the lesson is teaching students about tornado safety. Use posters and handouts to discuss:
