- **Stage 3:** Late expanding ? birth rates decline, and growth slows down.
- **Stage 4:** Low fluctuating ? both birth and death rates are low, leading to a stable or slowly declining population.

2. What is the difference between absolute and relative population growth?

- **Absolute growth:** The total increase in population numbers over a period.
- **Relative growth:** The percentage increase relative to the initial population size.

3. How does urbanization affect population distribution?

Urbanization leads to more people living in cities, which can cause:
